MEMORANDUM FOR: [REDACTED]

SUBJECT: Evaluation of CIA/IR A.GRA SC 60-1

The geographer responsible for developing the method used for the plotting of certain activities as described in the referenced GRA publication will be visiting the field collectors of the data in the near future. It would be appreciated if you would supply me with any comments or ideas that you may obtain from SAC regarding this matter. We wish to know as much as possible of SAC's reaction to this method and the potential importance of it to them before talking to the field units.
